

Capital Improvement Project Plan

PW 12-08

Project Number:

PW 12-08

Project Name:

Citywide Water System Repairs

Department Responsible:

Public Works / Ken Reed

Contact Number:

209-941-7363

Project Description:

This project completes replacement and repairs of deficiencies in the City's water network. Approximately 15 water valves have been identified throughout the City which are in need of repair or replacement. The work to repair or replace these water valves requires skills and equipment not possessed by City Staff. The current budgeted amount of \$133,560 was not enough to cover the cost of the repairs and a budget amendment was needed to finish the project replacements.

Justification:

A 2012 review of the City's water system disclosed a number of water valves in need of replacement or repair. Functional water valves are critical to operation of the City's water system and required to maintain compliance with the City's State Permit to operate a domestic water system.
