

TRACY SUBBASIN OPEN HOUSE

Progress Towards Basin Sustainability

Please join us for coffee and a short community meeting focused on groundwater sustainability planning in your region.

The Tracy Subbasin Groundwater Sustainability Agencies (GSAs) are local agencies responsible for managing the region's groundwater resources. The GSAs will be providing updates on recent projects and plans to help achieve local groundwater sustainability goals. The meeting will also highlight the Banta-Carbona Irrigation District's (BCID) pipeline extension project, which aims to reduce regional groundwater pumping and help steward local groundwater resources.

Thursday, October 30, 2025

10 AM – 11 AM

**Banta-Carbona Irrigation District Office
(3514 W Lehman Rd, Tracy, CA 95304)**

Coffee and other refreshments will be provided. We hope to see you there!
